

The listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently Amended) A liquid crystal display apparatus comprising:  
a first plastic substrate;  
a light-emitting device formed over the first plastic substrate;  
a resin covering the light-emitting device;  
a polarizing plate formed over the resin;  
an insulating film adhered to the [[resin]] polarizing plate with an adhesive;  
a semiconductor device formed over the insulating film;  
a liquid crystal cell electrically connected to the semiconductor device; and  
a second plastic substrate,  
wherein the semiconductor device and the liquid crystal cell are formed between  
the first plastic substrate and the second plastic substrate, and  
wherein the first plastic substrate is larger than the second plastic substrate.
2. (Currently Amended) A liquid crystal display apparatus comprising:  
a first plastic substrate having a concave portion;  
a plurality of light-emitting device devices formed in the concave portion of the  
first plastic substrate;  
a resin formed in the concave portion to cover the light-emitting device;  
an insulating film adhered to the resin with an adhesive;  
a semiconductor device formed over the insulating film;  
a liquid crystal cell electrically connected to the semiconductor device; and  
a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate, and  
wherein the first plastic substrate is larger than the second plastic substrate.

3. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate;  
a metal film formed over the first plastic substrate;  
a light-emitting device formed over the first plastic substrate;  
a resin covering the light-emitting device;  
a polarizing plate formed over the resin;  
an insulating film adhered to the [[resin]] polarizing plate with an adhesive;  
a semiconductor device formed over the insulating film;  
a liquid crystal cell electrically connected to the semiconductor device; and  
a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate, and  
wherein the first plastic substrate is larger than the second plastic substrate.

4. (Currently Amended) A liquid crystal display apparatus comprising:

a first plastic substrate having a concave portion;  
a metal film formed over the concave portion;  
a plurality of light-emitting device devices formed in the concave portion;  
a resin formed in the concave portion to cover the light-emitting device;  
an insulating film adhered to the resin with an adhesive;  
a semiconductor device formed over the insulating film;  
a liquid crystal cell electrically connected to the semiconductor device; and  
a second plastic substrate,

wherein the semiconductor device and the liquid crystal cell are formed between the first plastic substrate and the second plastic substrate, and

wherein the first plastic substrate is larger than the second plastic substrate.

5. (Original) A liquid crystal display apparatus according to any one of claims 3 and 4, wherein the metal film is sand blasted.

6. (Original) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal cell is transparent to light.

7. (Original) A liquid crystal display apparatus according to claim 1, wherein the light-emitting device is a light-emitting diode.

8. (Original) A liquid crystal display apparatus according to claim 7, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

9. (Original) A liquid crystal display apparatus according to claim 2, wherein the light-emitting device is a light-emitting diode.

10. (Original) A liquid crystal display apparatus according to claim 9, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

11. (Original) A liquid crystal display apparatus according to claim 3, wherein the light-emitting device is a light-emitting diode.

12. (Original) A liquid crystal display apparatus according to claim 11, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

13. (Original) A liquid crystal display apparatus according to claim 4, wherein the light-emitting device is a light-emitting diode.

14. (Original) A liquid crystal display apparatus according to claim 13, wherein the light-emitting diode is connected to an FPC and supplied with current via the FPC.

15. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a cellular phone.

16. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in an electronic book.

17. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a wrist watch.

18. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a personal computer.

19. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in a front glass.

20. (Previously Presented) A liquid crystal display apparatus according to any one of claims 1 to 4, wherein the liquid crystal display apparatus is incorporated in an electronic card.

21.-45. (Canceled)

46. (Previously Presented) A liquid crystal display apparatus according to claim 2, wherein the resin has a flat surface so as to fill the concave portion with the resin.

47. (Previously Presented) A liquid crystal display apparatus according to claim 4, wherein the resin has a flat surface so as to fill the concave portion with the resin.

48. (Previously Presented) A liquid crystal display apparatus according to claim 1, wherein the resin comprises a transparent particle.

49. (Previously Presented) A liquid crystal display apparatus according to claim 2, wherein the resin comprises a transparent particle.

50. (Previously Presented) A liquid crystal display apparatus according to claim 3, wherein the resin comprises a transparent particle.

51. (Previously Presented) A liquid crystal display apparatus according to claim 4, wherein the resin comprises a transparent particle.

52. (Previously Presented) A liquid crystal display apparatus according to claim 1, wherein the light-emitting device includes a pair of electrodes.

53. (Previously Presented) A liquid crystal display apparatus according to claim 2, wherein the light-emitting device includes a pair of electrodes.

54. (Previously Presented) A liquid crystal display apparatus according to claim 3, wherein the light-emitting device includes a pair of electrodes.

55. (Previously Presented) A liquid crystal display apparatus according to claim 4, wherein the light-emitting device includes a pair of electrodes.

56. (Canceled)

57. (Previously Presented) A liquid crystal display apparatus according to claim 2 further comprising a polarizing plate over the resin.

58. (Canceled)

59. (Previously Presented) A liquid crystal display apparatus according to claim 4 further comprising a polarizing plate over the resin.

60. (New) A liquid crystal display apparatus according to claim 1 or 3, wherein a plurality of light-emitting devices are formed over the first substrate.
